The Arda chair presents a charming contemporary look with comfort. This chair offers a space-efficient design that retains a small footprint and is effortless to reposition. The beautiful finished wood outer back is constructed with tapered veneer that conforms comfortably to the back.

It has endless applications in residential, hospitality, libraries, corporate public spaces, executive lounges and conference spaces where informal meetings take place.

Upholstered in fabric, leather or a combination, the chair is plywood construction with fortrel covered foam seat and back cushions. The stainless steel handle on the back easily facilitates moving the chair around on the two front fixed casters.

The back shell is offered in maple, walnut and cherry. The rear legs are brushed aluminum. The front casters are available in numerous finishes.
