## Shift+ Base Folding table and four-legged table.

### Folding table:

Structure consisting of a centrally positioned steel-tube cross-member with an articulated console. Folding function can be deployed with a two-hand safety actuator under the table top. With a fitting for securing the table top in the horizontal and vertical positions.

Table top (bottle-shaped) made of melamine-resin-coated LIGNOpal chipboard with glued-on plastic edge. The edges are rounded (22 mm).

Frame consisting of two curved, powder-coated or chrome-plated steel tubes and 4 lockable castors.

Table heights in accordance with DIN EN 1729.

Function. With the table folded upright any number of tables can be pushed together to optimise space.

### Four-legged table (Cross):

Frame consisting of welded round steel-tube legs with set-back rectangular steel-tube casing frame, in each case powder-coated. Table with 4 lockable castors.

Table heights in accordance with DIN EN 1729.

Table top (bottle-shaped) made of melamine-resin-coated LIGNOpal chipboard with glued-on plastic edge. The edges are rounded (22 mm).

The following material groups are available to choose from: Frame made of steel: M1,2; Top made of LIGNOpal: L1, (white).
